

EXISTING PRODUCTS 2

This product does its job and that's it, there's extra fancy stuff, however the product on the whole is very good, it holds everything it's supposed to. But I think the product should look more attractive, it is very plain. I think the price is suitable.

This system is very attractive, but with the wide shelves. There is lots of room for a range of products. There is some space wasted depending on what you put in. It needs to be cheaper.
